Profit by modernizing your clients' cybersecurity and backup with Acronis' integrated approach – cyber protection

Prevent client downtime and data loss with essential cyber protection

Acronis Cyber Protect Cloud is the only solution that natively integrates cybersecurity, data protection and management to protect endpoints, systems and data. This synergy eliminates complexity so that service providers can protect clients better while keeping costs down.

ABOUT ACRONIS CYBER PROTECT CLOUD

The only single-agent solution that natively integrates cybersecurity, data protection and management to protect data, endpoints and systems.

The world's best backup and recovery

Full-image and file-level backup and recovery safeguard data on more than 20 platforms — with near-zero RPOs and RTOs.

Enhanced with essential cyber protection at no additional cost

Acronis' advanced machine intelligence-based behavioral detection engine stops malware, ransomware and zero-day attacks on client endpoints and systems.

With protection management built for service providers

Thorough post-incident investigation and proper remediation tools keep costs down for service providers — digital evidence is collected and stored in a secure central repository.

Strengthen your security services and improve profitability

Reduce security incidents and breaches

- Secure all client workloads with next-generation cyber protection
- Minimize your clients' security risks with integrated cyber protection that covers 100% of their endpoints
- Unlock unique capabilities not available from your current security vendor

Increase your profitability

- Boost your monthly recurring revenue by strengthening your security services
- Unlock easy upsell and cross-sell opportunities built on one solution that includes cybersecurity, backup and recovery, file sync and share and a security management toolkit
- Reduce churn by demonstrating your cyber protection results to clients via integrated reporting
- Build client loyalty and trust with Acronis' pre-built education and marketing materials

Lower costs

- Cut cyber protection costs by up to 50%
- Consolidate vendors instead of purchasing multiple point solutions from multiple vendors
- Simplify management, improve workflow automation and reduce the security risks caused by using a patchwork of tools
- Harness the power of one with an integrated solution: one license, one agent, controlled and deployed through one intuitive console
