

## Veritas™ Desktop and Laptop Option

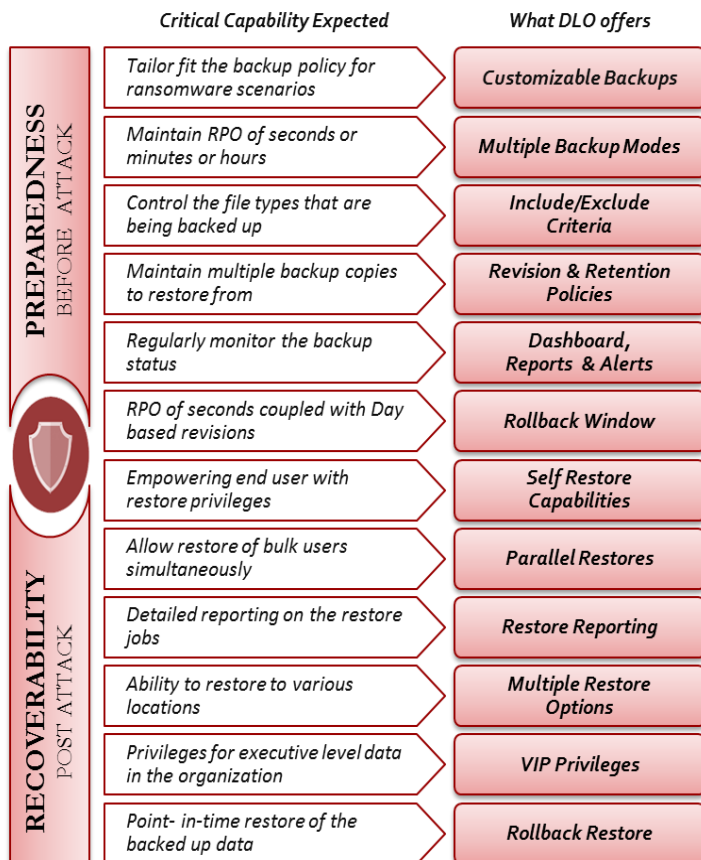

Automated file backup and recovery for Windows and Mac

### OVERVIEW

Veritas™ Desktop and Laptop Option is a user centric backup solution that provides flexible implementation and centralized administration for backup and recovery of Windows and Mac desktops and laptops in the organization. This highly scalable solution with distributable components is suitable for environments of any scale, be it single-site, multi-site, or having remote offices, allowing you to protect even the most recent files with your users.

Built-in features include source side deduplication with content aware deduplication of Outlook PST and NSF files, automatic network selection for non-intrusive backup experience which enables switching between the offline, online and backup over internet modes, self-restore capabilities offered through agent, web browser and a mobile application, rollback capabilities for ransomware protection and also detailed auto reporting.

While incumbent antivirus software cannot be relied upon for detecting & preventing all ransomware, an endpoint backup strategy continues to be an effective fail-safe plan that ensures reliable backups to restore from.

#### Product Highlights & Benefits:

**Automated Non-Intrusive Backups** - Desktops and laptops are protected automatically regardless of the connected network without any user intervention required.

**Continuous Data Protection** - Instantaneous backups with RPO of seconds including support for work-in-progress documents.

**Flexible Implementation** - Distributable components to suit the organizational needs and size with the ability to remotely install the agents on desktops and laptops.

**Ransomware Revival Strategy** - Highly customizable backup configurations ensuring a fail-safe plan against ransomware threats.

**Centralized Management** - Dashboard enabled administration console providing a graphical visualization of the endpoint backup environment.

**Built-in Security & Resiliency** - Integrated 256-bit Advanced Encryption Standards (AES) encryption with automatic Data Integrity checks and interruption tolerance.

**Storage & Network Efficient Backups** - Built-in global source-side data deduplication and bandwidth throttling capabilities for fine tuning backup performance.

**Automated Reporting** - Detailed reports on the endpoint backup environment with predictive backup status reporting for effective monitoring.

**Self-restore capabilities** - Empower end users to browse and restore the backed up files without any support assistance.

**Instantaneous access to backed up files** - Mobile application for iOS & Android platforms for on-the-fly access on smart devices.

## KEY FEATURES

- **VPN-less Backups over the Internet** - Automatic network selection ensuring seamless backups over an available internet connection when computers are not connected to the corporate network.
- **Delta Backups** - Backup incrementally only the changes that are performed on the files ensuring network and storage efficiency.
- **Administrator Dashboard** - Easy to interpret, real time interface that provides a graphical visualization of the endpoint backup environment from the operational, deployment and capacity planning perspectives.
- **Backup Status Report** - Predictive report enabling administrators to monitor the status of backups across the organization which can be configured for auto generation.
- **Rollback Restore** - Enhanced Restore capabilities with point-in-time restore or backed up files and detailed reporting on the restore activities.
- **Alerts and Notifications** - Empower the administrators and specified users with detailed alerts and notifications for regular updates on the endpoint backup environment.
- **Audit Trail** - Enabling organizations for compliance by providing accountability for the actions performed within the endpoint backup environment.
- **Endpoint Migration Utility** - Empower end users for hardware refresh scenarios with options to effectively migrate their files from one laptop to another.

## WHAT'S NEW WITH DESKTOP AND LAPTOP OPTION 9.7

- **Veritas DLO VxUpdate** - The VxUpdate feature allows the DLO administrators to check and perform any updates available for the currently installed version of the DLO. In addition to this, the feature also includes an option to update some of the key Third Party components.
- **Remote Wipe** - DLO now provides the administrator with the ability to remotely delete the User data from the Backup Selections and uninstall DLO Agent, in scenarios of decommissioning a user machine.
- **Lengthy Global file/folder path exclusion and notification** - DLO now filters out and excludes the file/folder from the backup with name or path longer than 200 characters. It also has a new notification for users whose file/folder gets excluded and DLO Administrator gets the entire user's file/folder Exclusion Status.
- **Custom Port selection** - The DLO administrator now has the option of choosing customized ports for DLO Servers (Edge Server, IO Server and Dedupe Server) during fresh installation.
- **DLO 100% Backup Completion Report** - DLO now provides a complete list of all users/computers in the environment who have successfully completed the backup 100% at least once.
- **Mac Agent Notarization** - DLO Mac agents are now notarized, thereby ensuring compliance with Apple's safety guidelines.
